

# UI GUIDE

What four elements on the website will be interactive?

1. Mobile Hamburger Menu: This will be a responsive hamburger menu accessible from all pages.
2. "Read More" Open and Close: This will be image based, in which user will be able to click on an image and read the dog's name.
3. Accordion: This will be where the FAQ will be displayed and users can read answers to common FAQ questions.
4. Popup: This will be a popup displaying dogs to adopt.

How will a user interact with these elements?

1. They will click on Hamburger menu in order to access navigation.
2. They will be able to click on dog picture to read name.
3. They will be able to click on + sign to read the answer to the FAQ.
4. They will be able to view popup after 3 second delay.

What will the result of the event be?

1. Easy navigation.
2. See name of dog.
3. Read the answer to the FAQ.
4. Read the popup.

What API will you be using?

The name of it is Dog API and it will display random images or text of a different breed of dog.
